Printed in Canada

First Edition

"A Brook in the City" by Robert Frost from THE POETRY OF ROBERT FROST edited by Edward Connery Lathem, © 1923, 1969 by Henry Holt and Co., copyright 1951 by Robert Frost. Reprinted by permission of Henry Holt and Company, LLC.

Published by

The Nature Center at Shaker Lakes
2600 South Park Boulevard
Cleveland, Ohio 44120-1699
216-321-5935

Cover photographs:
Great Blue Heron with a Snail at the Lower Shaker Lake; Eastern Chipmunk; Greek Cultural Garden; Chicory Flower; Doan Brook Waterfall; Horseshoe Lake.
Photographs by L.C. Gooch.

With assistance from a grant by

The Northeast Ohio
Regional Sewer District
3826 Euclid Avenue
Cleveland, Ohio 44115-2504

Design and layout by

Andrew Faris

Under the direction of

Professor John Brett Buchanan
GLYPHIX Graphic Design Studio
Kent State University
Kent, Ohio

To Mary Elizabeth Croxton, Jean Eakin, Betty Miller, and all the women of the garden clubs.

Without you there would be little left to say about Doan Brook.

Acknowledgements

Preparation of *The Doan Brook Handbook* required the help of many people. Nancy King Smith and Jeremie Maehr of the Nature Center at Shaker Lakes helped shape the *Handbook* from start to finish and were instrumental in making it a reality. They also provided much valuable input, coordination, and moral support along the way, as did Victoria Mills.

Betsy Yingling from the Northeast Ohio Regional Sewer District and Roy Rudolph from Montgomery Watson, Inc., provided technical input and data whenever I asked. Betsy also reviewed much of the text. David Haywood and Leonard Sekuler of Montgomery Watson helped with the graphics. Janice Eatman of Case Western Reserve University told me about some of the history of the lower watershed. Catherine Winans and Mary Jo Groppe of the Shaker Historical Society and its Elizabeth Nord Library provided insight into upper watershed history and helped me find relevant material in their collection. Librarians from the Cleveland Museum of Natural History's Harold Terry Clark Library and the Western Reserve Historical Society were also very helpful.

Many people reviewed sections of the text for technical content, including: Mark Knapp, Leslie Krebs, and Stephanie Thomas from the Nature Center at Shaker Lakes; John Grabowski from the Western Reserve Historical Society; Bob and Florence Spurney; Catherine Winans and Mary Jo Groppe of the Shaker Historical Society; Leo Deininger; and Peter Whiting and Joseph Koonce from Case Western Reserve University. Cathie Podojil, Bob Gooch, and Rachel Gooch provided general editorial review.

My husband, David Kazdan, helped in too many ways to mention.

The *Handbook* design and layout were done by Andrew Faris of Kent State University's GLYPH[X graphic design studio, under the direction of Professor John Brett Buchanan. Andrew also worked on many of the graphics and coordinated the printing.

Funding for the *Handbook* was provided by a special projects grant from the Northeast Ohio Regional Sewer District to the Nature Center at Shaker Lakes. The George Gund Foundation has provided general support to the Nature Center for on-going work related to Doan Brook.

Contents

1	Introduction to Doan Brook	1
2	The Hand of Man: The Human History of Doan Brook	3
2.1	Who Was Here First? Pre-European History	3
2.2	European Explorers: Moses Cleaveland and the Surveyors	4
	<i>Definitions and Orientation</i>	4
2.3	First European Settlers: Nathaniel Doan and the Lower Watershed	5
2.4	The Valley of God's Pleasure: The Shakers and the Upper Watershed	7
	<i>Who Were the North Union Shakers?</i>	8
2.5	The City Moves East: Development of the Watershed	9
	<i>The Rise and Fall of the Great Stone Grist Mill</i>	12
	2.5.1 The Lower Watershed	13
	2.5.2 The Upper Watershed	13
2.6	Preserving the Land: The Story of the Parks	14
2.7	The Brook in the City: Citizen Activists and the Fight for the Doan	15
3	The Shape of the Brook: Physical Features That Form the Stream	19
3.1	Where Is It? The Brook's Location	19
	<i>Brook Location Facts</i>	20
3.2	Where Does the Water Come From? The Doan Brook Watershed	20
3.3	Why Does the Brook Flow When It Isn't Raining? The Contribution of	23
	Groundwater	
	3.3.1 The Influence of the Groundwater System	23
	3.3.2 Doan Brook's Groundwater System	24
	<i>Groundwater Use in the Doan Brook Watershed</i>	24
3.4	How Is It Shaped? Brook and Watershed Topography	25
	<i>Experiencing Topography Firsthand: The Watershed by Bicycle</i>	26
3.5	The Bones of the Doan: Watershed Geology and Soils	27
4	Who Else Lives Here? The Natural Environment of the Brook	29
4.1	Vegetation Along the Brook and in the Watershed	29
	<i>The Pre-Settlement Forest:</i>	30
	<i>Upper Watershed</i>	30
	<i>Escarpment and Gorge</i>	30
	<i>Lower Watershed</i>	30
4.2	Wildlife Along the Brook and in the Watershed	32
	<i>Pre-Settlement Wildlife</i>	32
	4.2.1 Birds	33

4.2.2	Mammals	33
4.2.3	Reptiles and Amphibians	34
4.3	Who Lives in the Brook? Lake and Stream Dwellers	34
	<i>Macroinvertebrates: Water Quality Canaries</i>	34
4.4	Who Might Live Here? Habitat Potential of the Brook and Its Surroundings	35
	<i>The New Fish in the Brook</i>	36

5

	The Urban Brook	39
5.1	How Have We Changed the Brook? Alterations to the Stream Shape	39
5.1.1	Dams and Lakes	39
5.1.2	Culverts and the Vanishing Brook	39
5.1.3	Channelization: The Inflexible Stream	40
5.1.4	Other Stream Channel Changes	40
	<i>The Impact of Change:</i>	41
	<i>Lake Construction</i>	41
	<i>Culverts</i>	41
	<i>Channelization</i>	41
5.2	Moving and Shaking in the Watershed: Changes in the Brook's Drainage Area	42
5.2.1	Changes in the Watershed Land Area	42
5.2.2	Changes in the Nature of the Land	42
	<i>The Impact of Change:</i>	43
	<i>Changes in Watershed Size and Shape</i>	43
	<i>Changes in Watershed Surface</i>	43
5.3	Where Do the Sewers Fit In? The Sewershed and Storm Sewer Drainage	44
5.3.1	The Sanitary Sewer System and the Sewershed	44
5.3.2	Separated Storm and Sanitary Sewers: The Upper Watershed	45
	<i>Why Does the Storm Sewer Stink? Problems with Separated Sewers</i>	45
5.3.3	The Combined Sewer System: The Lower Watershed	46
	<i>Who Owns the Sewers?</i>	46
5.3.4	Flowing into the Doan: Where Storm and Combined Sewers Feed the Brook	46
	<i>The Impact of Change: Sewers</i>	46
5.3.5	Change in Progress: The Impact of the Heights/Hilltop Interceptor	48
5.4	What Difference Does It Make? Summarizing the Impacts of Change	48

6

	Is It Polluted? Water Quality in the Brook	51
6.1	How Dirty Is the Brook? What Water Quality Measurements Show	51
6.1.1	Water Quality in the Brook	52
6.1.2	Water Quality in the Lakes	52
6.1.3	Sediment Contamination	55

6.2 Why Does It Matter? The Impact of Contamination55
 6.3 Where Does the Pollution Come From? Contaminant Sources56
 6.3.1 Sources of Bacteria56
 6.3.2 Sources of Nutrients56
 6.3.3 Sources of Other Contamination57
 6.4 Solutions to Doan Brook Pollution57

7

The Brook in the Rain: The Hydrology of the Doan59
 7.1 A History of Doan Brook Floods59
 7.2 Where Does the Water Come From? Watershed Runoff Patterns61
 7.3 Why Is There a Flood? The Brook Under Duress61
 7.4 How Strong are the Dams? The Safety of the Shaker Lake Dams62
 7.5 How Big is the Pipe? The University Circle Culvert and the Downstream
 Channels
 What Do the Lakes Do? Lake Sedimentation and Flood Storage63
 7.6 What Can We Do? Solutions to Flooding64
 Impact on Flooding: What Does the MLK Detention Basin Do?65

8

What Can We Do? Doan Brook Restoration69
 8.1 Simplifying the Problem: Getting a Handle on What Doan Brook Needs69
 8.2 What Are We Trying to Accomplish? The Target of Restoration69
 8.3 What Methods are Available? The Universe of Restoration Techniques71
 8.3.1 Hydrologic Restoration72
 8.3.2 Water Quality Restoration73
 8.3.3 Habitat Restoration75
 8.4 Narrowing the Choices: Sketching a Restoration Plan77
 What the Law Requires: Actions by NEORS and the Cities78

9

The Future of the Doan: The Need for Watershed Management83
 9.1 Step Zero: The Commitment83
 9.2 Step One: Gathering the Players83
 Existing Meetings of the Players84
 9.3 Step Two: Assessing the Problem84
 9.4 Step Three: Setting Goals84
 9.5 Step Four: Evaluating Options85
 9.6 Step Five: Formulating the Plan86
 9.7 Step Six: Communicating86

9.8	Step Seven: Realizing the Plan	86
9.9	Step Eight: Evaluating Progress, Reevaluating the Plan	86
Epilogue		89
Glossary		91
Annotated Bibliography		99
Appendix A	A General Tour of Doan Brook	111
Appendix B	An Outline of Doan Brook History	119
Appendix C	Doan Brook History: A Watershed History Tour	129
Appendix D	Doan Brook Watershed Cultural Institutions	135
Appendix E	Doan Brook Geology and Soils	137
Appendix F	A Geologic Doan Brook Tour	141
Appendix G	Doan Brook Biology Data	153
Appendix H	Doan Brook Hydrology Data	181
Appendix I	Doan Brook Water Quality Data	189
Appendix J	Watershed Restoration Techniques for Doan Brook	231
Index		239

LIST OF TABLES

5-1	Summary of Estimated Doan Brook Drainage Areas	47
6-1	Percentage of Samples with Concentrations That Are Significantly Greater Than Those in Unpolluted Streams (Selected Contaminants)	53
6-2	Percentage of Samples That Violate Water Quality Criteria	54
7-1	An Incomplete History of Doan Brook Flooding	60
8-1	Summary of Doan Brook's Problems	70
8-2	Measures for Hydrologic Restoration of Doan Brook	72
8-3	Measures for Water Quality Restoration of Doan Brook	74
8-4	Measures for Habitat Restoration Along Doan Brook	76
8-5	Summary of Doan Brook Restoration Techniques	79
E-1	Significant Soils in the Doan Brook Watershed	139

F-1	Summary of the Geologic Tour	142
F-2	Bedrock Outcrops in the Doan Brook Watershed:	150
	Highest Formation to Lowest	
G-1	Trees of the Doan Brook	154
G-2	Shrubs of the Doan Brook	157
G-3	Herbaceous Plants of the Doan Brook	159
G-4	Fungi of the Shaker Lakes Area	162
G-5	Birds of the Doan Brook	163
G-6	Mammals Along the Doan Brook	171
G-7	Reptiles and Amphibians of the Doan Brook	172
G-8	Fish in the Doan Brook	172
G-9	Fish Expected in the Doan Brook	173
G-10	Macroinvertebrates in the Shaker Lakes	174
G-11	Macroinvertebrates in the Doan Brook	176
H-1	Summary of Doan Brook Hydrologic Information	183
H-2	Summary of Information About Major Doan Brook Culverts	184
H-3	Doan Brook Peak 10-Year Flood Flows: Estimates from Different Sources	185
I-1	Summary of Doan Brook Sampling	196
I-2	Water Quality Sampling Results for the Brook	199
I-3	Summary of 1998 Lake Sampling	213
I-4	Temperature, pH, and D.O. Profiles of the Shaker Lakes	214
I-5	Water Quality Sampling Results – Lower Shaker Lake	215
I-6	Water Quality Sampling Results – Horseshoe Lake	218
I-7	Water Quality Sampling Results – Marshall Lake	220
I-8	Water Quality Sampling Results – Green Lake	221
I-9	Water Quality Sampling Results – Bacteria	222
I-10	Biological Sampling Results	225
I-11	Water Quality Index Sampling Results	226
I-12	Herbicide and Pesticide Lake Sampling	227
I-13	Lake Sediment Sampling Results	228
I-14	Sediment Sampling in the Brook	229
J-1	Description of Watershed Restoration Measures	231

LIST OF FIGURES

	The Doan Brook Gorge	1
	Horseshoe Lake Dam – 1900	2
2-1	Nathaniel Doan’s Original Land	6
2-2	North Union Shaker Lands and Communities	7
2-3	Shaker Center Family Village – ca. 1870	10
2-4	Shaker Mill Family Village – ca. 1870	10
2-5	Shaker Gathering Family Village – ca. 1870	11
2-6	Shaker Woolen Mill	11
2-7	Shaker Stone Grist Mill	11
2-8	Doan Brook Park Lands	14
2-9	Rockefeller Park Cultural Gardens – 1939	15
2-10	Proposed Alignment of the Clark and Lee Freeways	16
2-11	Clark and Lee Freeway Interchange at Lower Shaker Lake	17
